

Louis-Simon Ménard

SENIOR UNITY / C# DEVELOPER | GAMEPLAY, TOOLS & TECHNICAL ART

Montréal, Québec | (514) 567-2836 | lsmenard@gmail.com

PROFESSIONAL SUMMARY

Senior Unity and C# developer with 20 years of professional game-development experience, including recent roles at Unity Technologies and CAE Healthcare. Experienced in Unity Editor integration, gameplay and simulation systems, technical planning, animation workflows, UI, prototyping, and full-cycle product delivery. Combines strong engineering judgment with a background in game design, 2D/3D art, animation, and independent production. Comfortable owning features from early concept and planning through implementation, iteration, and delivery.

CORE STRENGTHS

Programming: C#, Unity, Python, C++, Java, ActionScript 3

Game Development: Gameplay systems, prototyping, UI, animation workflows, game design

Tools & Production: Unity Editor integration, feature planning, technical design, Jira, Azure

Technical Art: URP, shaders, sprites, 2D/3D animation, Blender, Photoshop

Leadership: Product ownership, small-team leadership, cross-disciplinary communication

Languages: French and English - spoken and written

PROFESSIONAL EXPERIENCE

Unity Technologies - Senior Software Developer

2022-2025

- Supported an AI research team by integrating research results into Unity Editor workflows.
- Owned the design, planning, and delivery of a new product intended to connect animators with machine-intelligence capabilities.
- Worked across research, product, and engineering concerns to turn experimental technology into a usable creator-facing experience.

CAE Healthcare - Senior Software Developer

2020-2022

- Developed Unity-based medical simulations for nursing education.
- Contributed across client relations, design, planning, implementation, and delivery.
- Acted as a frequent liaison between physicians and the engineering team to clarify requirements and translate clinical needs into software features.
- Left on excellent terms to join Unity Technologies.

Bunker Sim - Independent Producer / Lead Developer

2016-2020

- Created an original post-apocalyptic colony-management game in Unity and recruited a small production team.
- Led programming, artistic direction, game design, planning, animation, and marketing.
- Presented the project at PAX East 2016; a larger-scale Unity version remains in production.

Monsieur Moustache - Senior Software Developer / Lead Programmer

2016

- Led development of interactive advertising mini-games for Intact Insurance.

House of Wolves 2 - Independent Producer / Developer

2015-2016

- Developed a Unity strategy game inspired by classic real-time strategy titles.
- Owned C# programming, IP creation, game design, art direction, planning, animation, and marketing.

SELECTED GAME DEVELOPMENT EXPERIENCE

Sellsword - Independent Producer / Developer

2015

- Created a 2D medieval multiplayer combat web game, including multiplayer systems, website, art direction, design, planning, animation, and marketing.

Planet Noevo 2 - Independent Production - Published by Armor Games

2014

- Created and shipped a survival game, including IP, game design, planning, programming, animation, marketing, and small-team coordination.

Armor Games - Senior Software Developer

2010-2014

- Created more than 20 browser games with end-to-end ownership of design and implementation.
- Managed external artists when additional production capacity was needed.
- Delivered multiple successful releases to a large player audience while maintaining a strong long-term publishing relationship.

Odd1 - Programmer & Game Designer

2009

- Developed games connected to television animation franchises and strengthened professional experience in programming methodology and teamwork.

Max Games - Age of War 2 - Lead Developer

2008-2009

- Built the sequel after the success of Age of War, hired three artists, and led production from a newly formed small studio.
- The game reached millions of players worldwide.

Age of War - Creator / Competition Winner

2006

- Won first prize in the Max Games competition; the game became a major online success with millions of plays.

EDUCATION

Computer Science Technology (Intensive), Cégep du Vieux Montréal

2015-2016

Completed two intensive semesters while strengthening programming fundamentals across languages, protocols, and architectural models.

3D Animation & Digital Imaging, Cégep du Vieux Montréal

2006-2009

Training in traditional and digital art, 2D/3D animation, lighting, modeling, rigging, texturing, and shaders.

Graphic Design Concentration, Collège Jean-Eudes

2001-2006

Early foundation in programming, graphic design, web development, multimedia, and 3D tools.
